Subject Index to Volumes 60–66, 1994

Additive Multi-attribute Functions, Imprecisely Assessed, Screening Discrete Alternatives with, 60:69
Algebraic Property of Flow Diagram in a Time-Reverse Cellular Automaton, 62:103
Algorithm Extraction, A Practical Model for Multidisciplinary Analysis Data and, 65:111
Analytic Solutions of Coupled Second-Order Delay Differential Equations, 62:235
ARMA Processes, Computing the Asymptotic Covariance Matrix of a Vector of Sample Autocorrelations for, 64:121
Artificial Compressibility Formula, a Modified, A Time Accurate Calculation Procedure for Flows with a Free Surface Using, 65:33
Asymptotic Covariance Matrix of a Vector of Sample Autocorrelations for ARMA Processes, Computing the, 64:121
Asymptotic Error Expansion of Two-Dimensional Volterra Integral Equation by Iterated Collocation, 61:269
Atkinson, On a Method of, for Evaluating Domain Integrals in the Boundary Element Method, 60:125
Autonomic Life as the Proof of Incompleteness and Lawvere's Theorem of Fixed Point, 61:231
Autonomous Ordinary Differential Equations, A Method for Finding the Periodic Solution of, 66:161
Axisymmetric Piezoelectric Devices, Simulation of, 65:355

B-Spline Approximations for Use in Numerical Grid Generation, Construction of, 65:295
Banach Spaces, The Midpoint Method in, and the Ptâk Error Estimates, 62:1
Bandit Theory, Nonparametric, The Time until the Final Zero Crossing of Random Sums with Application to, 63:235
Bar Materials, A Method for Putting to Rational Use, and a Computer Program, 63:59
Bayesian Estimation, Perfect Aggregation in, for Several Realistic Reliability Models, 64:139
Bessel Polynomials, Generalized, Orthogonality Relations and Generating Functions for, 61:99
BIBO, Variation of the Parameters Formula and the Problem of, for Singular Measure Differential Systems with Impulse Effect, 60:153
Bifurcation Curves for Multiparameter Positone Problems, On S-Shaped, 65:171
Bifurcation Theory and Radial Solutions to Elliptic Boundary Value Problems, 65:223
Binary Arrays, Invertible Shift-Invariant Transformations on, 62:259
Born Series, A Series Solution for the GVψ_0 Term of, 66:227
Boundary Element Method, On a Method of Atkinson for Evaluating Domain Integrals in the, 60:125
Boundary-Layer Equation, A Note on a Certain, 64:73
Boundary Layer Equation, On Solutions of a, 63:95
Boundary-Value Problem, L^p-Solvability of a Fourth-Order, at Resonance, 65:151
Boundary Value Problem, A Singular Elliptic, 65:183
Boundary Value Problems, a Class of Nonlinear, Some Multiplicity Results for, 65:195
Boundary Value Problems, Discrete, Arising in Transport Phenomena, 60:193
Boundary Value Problems, Elliptic, Bifurcation Theory and Radial Solutions to, 65:223
Boundary Value Problems, Linear, with Slowly Varying Coefficients, An Approximate Solution for, 60:285
Boundary Value Problems, Nonlinear, Cubic Spline on Quintic Spline Method for, 66:267
Boundary Value Problems, Two-Point, Solving, by Means of Deficient Quartic Splines, 66:25
Bounded and Periodic Solutions of Differential Equations in Banach Space, 65:141

Cellular Automata for Lipid Membranes, 63:187
Cellular Automata Studies of Cholesterol Effects on Gramicidin Ion Conductivity, 64:101
Cellular Automaton, Time-Reverse, Algebraic Property of Flow Diagram in a, 62:103
Chaotic Orbits, Reconstruction of, Under Finite Resolution, 66: 129
Chebyshev Expansion Method for Solving

Nonlinear Circuit Equations, 60:299
Cholesterol Effects on Gramicidin Ion Conductivity, Cellular Automata Studies on, 64:101
Complex Variable Residue Theory, Application of, to the Evaluation of Irrational Definite Integrals. III, 63:1
Complex Variable Residue Theory, Application of, to the Evaluation of Irrational Definite Integrals. IV, 63:35
Computational L_1-Approximation Technique for Integral Equations, The Sensitivity of a, 62:171
Computational Material Dynamics with Shocks, Eigenform Error Estimates of; 1. Hooke's Law Materials, 66:181
Computer Simulation of Unsteady Turbulent Boundary Layer Flow with the Effect of Free Stream Velocity, 63:151
Concise Row-Pruning Algorithm to Invert a Matrix, 61:17
Conjugate Points for Second Order Systems, On, 60:37
Connecting Orbits, On Locating, 65:231
Contact Discontinuities, Flux Difference Splittings and Limiters for the Resolution of, 65:3
Convection Flow through a Porous Medium, Unsteady Free, State Space Approach to, 64:191
Convergence Analysis for a Parallel Jacobi Algorithm, 62:191
Convergence of Iterative Methods for Nonclassically Damped Dynamic Systems, 61:61
Convergence Theorem for Newton-Like Methods under Generalized Chen–Yamamoto-Type Assumptions, 61:25
Convex Function, Extremum Points of a, 66:261
Coupled Second-Order Delay Differential Equations, Analytic Solutions of, 62:235
Crank–Nicolson Method, Alternating Block, for the 3-D Heat Equation, 66:41
Cubic Spline on Quintic Spline Method for Nonlinear Boundary Value Problems, 66:267
Cubic Structure on an Arbitrary Quadrilateral, 60:55

Difference Equation Model of Partial Series, 61:301
Difference Systems, Nonhomogeneous Implicit Higher Order, Closed Form General Solution of, 60:113
Differential Equations in Banach Space, Bounded and Periodic Solutions of, 65:141
Diffusion Problems, Existence, Uniqueness, and Stability for a Class of, 65:161
Dirichlet Polynomials, Some Properties of Mappings Induced by, 64:1
Discrete Alternatives, Screening, with Imprecisely Assessed Additive Multi-attribute Functions, 60:69
Discrete Conservation Laws, Derivation of, for a Family of Finite Difference Schemes, 64:13
Domain Integrals in the Boundary Element Method, On a Method of Atkinson for Evaluating, 60:125
Drazin Inverse, An Alternative Limit Expression of, and Its Application, 61:151
Droplet–Turbulence Interactions, Numerical Studies of, 65:63
Dynamic Producer–Consumer Market, Learning in a, 62:223

Economic Growth, Optimal, with Infinite Horizon, Optimal Control Problems Involving, 66:293
Eddy Current Problem, An Analysis of, by the Least-Squares Finite Element in 2-D, 60:179
Eigenform Error Estimates of Computational Material Dynamics with Shocks. 1. Hooke's Law Materials, 66:181
Elliptical Equation, A Widely Convergent Method for Determining the Distributed Parameters of, 60:139
Elliptic PDE Models, Surface Grid Generation Based on, 65:253
Elliptic-Type Integral, On the Epstein–Hubbell Generalized, 61:157
Epstein–Hubbell Generalized Elliptic-Type Integral, On the, 61:157
Exact RLS Adapative Algorithm, Neural Network for the, 60:103

Final Zero Crossing of Random Sums, The Time until, with Application to Nonparametric Bandit Theory, 63:235
Finite Difference Schemes, Derivation of the Discrete Conservation Laws for a Family of, 64:13
Finite Difference Schemes, Exponentially Fitted, A Computational Method for Solv-

ing Singular Perturbation Problems Using, 66:277
Finite Difference Solutions for Parabolic Equations with the Time Weighting Initial Conditions, 65:49
First Order Impulsive Partial Differential Inequalities, 61:207
First-Order Problems with Linear and Nonlinear Boundary Conditions, The Monotone Method for, 63:163
Flow, Compressible, Navier–Stokes Flow Field Analysis of, in High Pressure Safety Relief Valve, 65:345
Flow, Magnetohydrodynamics, Thermally Coupled, 65:79
Flow, Stationary MHD, A Velocity–Current Formulation for, 65:95
Flow Models and Channel Entry Conditions, A Review of; Single-Phase Flow through Porous Channels, 62:203
Flows with a Free Surface, A Time Accurate Calculation Procedure for, Using a Modified Artificial Compressibility Formula, 65:33
Fluid Flow with Low Mach Number, Three Level Fourier Spectral Approximations for, 63:131
Flux Difference Splittings and Limiters for the Resolution of Contact Discontinuities, 65:3
Food-Chain Populations, Dynamics and Numerical Simulations of, 65:335
Forest Resources Management, Interactive, Multiobjective Programming for, 63:75
Fourier Polynomials, Recent Results on the Regularization of, 66:1
Fourier Spectral Approximations, Three Level, for Fluid Flow with Low Mach Number, 63:131
Fractal Sets, A Projective Algorithm for Approximation of, 63:201
Function Fitting, An Extrapolation Technique to Iterate to the Smallest and Largest Eigenvalues of an Infinite-Dimensional Normal Matrix Used in, 62:17

Generating Functions for the Generalized Bessel Polynomials, Orthogonality Relations and, 61:99
Global Attractivity in a Nonlinear Difference Equation, 62:249
Grid Generation, Interactive, and NURBS Applications, 65:279
Grid Generation, Numerical, Construction of B-Spline Approximations for Use in, 65:295
Grid Generation, Structured Adaptive, 65:265
Grid Generation, Surface, Based on Elliptic PDE Models, 65:253
Growth Model, a Continuous Time Infinite Horizon, Sensitivity Analysis for, 60:43

Heat Equation, 3-D, Alternating Block Crank–Nicolson Method for the, 66:41
Heat Transfer, Mixed Convection–Radiation Interaction, in Boundary Layer over a Semi-infinite Flat Plate Embedded in Porous Medium with a Transfer Magnetic Field, 66:103
Hepatic Extraction of Insulin, Assessment, by Testing the Small Sample Mean Correlation Coefficient, 66:77
HIV Transmission Model Among Intravenous Drug Users, Qualitative Study of, 60:215
Homotropy Method, Finding Periodic Solutions of Ordinary Differential Equations via, 62:153
Hooke's Law Materials; Eigenform Error Estimates of Computational Material Dynamics with Shocks. 1, 66:181
hp Finite Element, Adaptive, for Transient Analysis, 65:315
Hyperbolic Conservation Laws with Single Stencil Reconstructions, A Numerical Method for Systems of, 65: 125
Hypernumbers Applied or How They Interface with the Physical World, 60:25

Income of Nations, Optimal Control of the Growth of, 62:279
Incompleteness, Autonomic Life as the Proof of, and Lawvere's Theorem of Fixed Point, 61:231
Independence an Exception?, 66:63
Infinite-Dimensional Normal Matrix Used in Function Fitting, An Extrapolation Technique to Iterate to the Smallest and Largest Eigenvalues of an, 62:17
Initial-Value Problem, Special Second-Order, Some New Variable-Step Methods with Minimal Phase Lag for the Numerical Integration of, 64:65
Insulin, Assessment of Hepatic Extraction of, by Testing the Small Sample Mean Correlation Coefficient, 66:77

Integral Equations, The Sensitivity of a Computational L_1-Approximation Technique for, 62:171
Interactive, Multiobjective Programming for Forest Resources Management, 63:75
Interval Algorithm for Nondifferentiable Global Optimization, 63:101
Invertible Shift-Invariant Transformations on Binary Arrays, 62:259
Investment, Using Linear Programming to Seek the Optimum Combination of, 66:175
Irrational Definite Integrals, Applications of Complex Variable Residue Theory to the Evaluation of; III, 63:1
Irrational Definite Integrals, Applications of Complex Variable Residue Theory to the Evaluation of; IV, 63:35
Is Independence an Exception?, 66:63

Jacobi Algorithm, a Parallel, Convergence Analysis for, 62:191

Kalman Filter, Extended, Sensitivity of an, 1. Variation in the Number of Observers and Types of Observations, 66:233
Kalman Filter, Extended, Sensitivity of an, 2. Variation in the Observation Error Levels, Observation Rates, and Types of Observations, 66:247

Lawvere's Theorem of Fixed Point, Autonomic Life as the Proof of Incompleteness and, 61:231
Learning Algorithm, an Adaptive Conjugate Gradient, for Efficient Training of Neural Networks, 62:81
Learning in a Dynamic Producer–Consumer Market, 62:223
Least-Squares Finite Element in 2-D, An Analysis of the Eddy Current Problem by the, 60:179
Levison Algorithm, An Error-Free, to Solve Integer Toeplitz System, 61:135
Limit Reliability Functions of Some Series-Parallel and Parallel-Series Systems, 62:129
Linear Half-Wave Rectification of Modulated Sinusoids, 62:61
Linear Programming, Using, to Seek the Optimum Combination of Investment, 66:175
Linear Systems, "Verticum"-Type, with Time-Dependent Linkage, 60:89
Lipid Membranes, The Cellular Automata for, 63:187
L^p-Solvability of a Fourth-Order Boundary-Value Problem at Resonance, 65:151

Magnetohydrodynamics [MHD] Flow, Stationary, A Velocity–Current Formulation for, 65:95
Magnetohydrodynamics Flow, Thermally Coupled, 65:79
Mappings Induced by Dirichlet Polynomials, Some Properties of, 64:1
Mathematical Aesthetics, Irregular Oscillations and, 61:183
Matrices, Randomly Generated, Efficient Computation of Eigenvalues of, 66:9
Matrices of Green's Type for the Potential Equation on a Cylindrical Surface Joined to a Hemisphere, 65:241
Matrix, Concise Row-Pruning Algorithm to Invert a, 61:17
Matrix Equation, A Special, and Its Application in Microelectronics, 64:115
Median, Storage Complexity of Some Estimators of the, 60:15
Method for Putting Bar Materials to Rational Use and a Computer Program, 63:59
Microelectronics, A Special Matrix Equation and Its Application in, 64:115
Mixed Convection–Radiation Interaction Heat Transfer in Boundary Layer over a Semi-infinite Flat Plate Embedded in Porous Medium with a Transfer Magnetic Field. 66:103
Modulated Sinusoids, Linear Half-Wave Rectification of, 62:61
Monotone Method for First-Order Problems with Linear and Nonlinear Boundary Conditions, 63:163
Monte Carlo Simulations, Comparison of Classical vs. Inverse Sampling for Estimating Plant Cover Using, 64:171
Multidisciplinary Analysis Data and Algorithm Extraction, A Practical Model for, 65:111
Multiphase Flow in Porous Media, Simulating, on KSR-1 Parallel Computers, 65:19

Navier–Stokes Flow Field Analysis of Compressible Flow in a High Pressure Safety Relief Valve, 65:345
Neural Network for the Exact RLS Adaptive Algorithm, 60:103

Neural Networks, An Adaptive Conjugate Gradient Learning Algorithm for Efficient Training of, 62:81
Neutral Delay Equations of Arbitrary Order, Nonlinear, Asymptotic and Oscillatory Behavior of Solutions of, 65:209
Nonclassically Damped Dynamic Systems, Convergence of Iterative Methods for, 61:61
Nondifferentiable Global Optimization, An Interval Algorithm for, 63:101
Nonhomogeneous Implicit Higher Order Difference Systems, Closed Form General Solution of, 60:113
Nonlinear Circuit Equations, A Chebyshev Expansion Method for Solving, 60:299
Nonlinear Difference Equation, Global Attractivity in a, 62:249
Nonlinear Oscillators, Generic, Solution of, 64:167
Nonlinear Stock Price Model, Qualitative Analysis of a, 63:123
Numerical Integration of Special Second-Order Initial-Value Problem, Some New Variable-Step Methods with Minimal Phase Lag for, 64:65

Optimal Control Problems Involving Optimal Economic Growth with Infinite Horizon, 66:293
Ordinary Differential Equations, Finding Periodic Solutions of, via Homotropy Method, 62:153
Orthogonality Relations and Generating Functions for the Generalized Bessel Polynomials, 61:99
Orthotropic Magneto-elastic Hollow Circular Cylinder, Torsional Wave Propagation in an, 63:281
Oscillations, Irregular, and Mathematical Aesthetics, 61:183
Oscillation Theorems for Second Order Neutral Difference Equations, 62:47
Oscillatory Behavior of Solutions of Forced Second Order Differential Equations with Alternating Coefficients, 60:1
Oscillatory Behavior of Solutions of Second Order Differential Equations, On the, 61:1
Oscillatory Behavior of Solutions of Second Order Functional Differential Equations, 62:183
Parabolic Equations with Time Weighting Initial Conditions, Finite Difference Solutions for, 65:49
Parallel-Series Systems, Some Series-Parallel and, Limit Reliability Functions of, 62:129
Parameter Methods for Summary Difference Equations in Several Independent Variables, Nonlinear Variation of, 61:39
Partial Differential Inequalities, On First Order Impulsive, 61:207
Partial Series, A Difference Equation Model of, 61:301
Pattern Recognition and Classification in Time Series Analysis, 62:29
Perturbation Problems, Singular, A Computational Method for Solving, Using Exponentially Fitted Finite Difference Schemes, 66:277
Plant Cover, Estimating, Comparison of Classical vs. Inverse Sampling for, Using Monte Carlo Simulations, 64:171
Positone Problems, Multiparameter, On S-Shaped Bifurcation Curves for, 65:171
Potential Equation on a Cylindrical Surface Joined to a Hemisphere, Matrices of Green's Type for, 65:241
Projective Algorithm for Approximation of Fractal Sets, 63:201
Ptâk Error Estimates, The Midpoint Method in Banach Spaces and the, 62:1

Quadrilateral, an Arbitrary, A Cubic Structure on, 60:55
Qualitative Analysis of a Nonlinear Stock Price Model, 63:123
Quartic Splines, Deficient, Solving Two-Point Boundary Value Problems by Means of, 66:25
Queues, $M^{[x]}/C_2/S/N$, Iterative Solution of, 66:313

Reliability Models, Perfect Aggregation in Bayesian Estimation for Several Realistic, 64:139
Riccati Equation, the Discrete Periodic, New Doubling Algorithm for, 60:265
RLS Adaptive Algorithm, the Exact, Neural Network for, 60:103
Ross–Taylor Theorem, A Note on, 64:207
Runge-Kutta Formula, the Classic, Estimating

the Error of, 66:217

Sampling for Estimating Plant Cover, Comparison of Classical vs. Inverse, Using Monte Carlo Simulations, 64:171
Second-Order Differential Equations, Forced, with Alternating Coefficients, Oscillatory Behavior of Solutions of, 60:1
Second Order Differential Equations, On the Oscillatory Behavior of Solutions of, 61:1
Second-Order Equations, Error Estimates for Shooting Methods in Two-Point Boundary Value Problems for, 60:237
Second Order Functional Differential Equations, On Oscillatory Behavior of Solutions of, 62:183
Second Order Neutral Difference Equations, Oscillation Theorems for, 62:47
Second Order Systems, On Conjugate Points for, 60:37
Self-Evaluation, The Dynamics of, 64:47
Sensitivity Analysis for a Continuous Time Infinite Horizon Growth Model, 60:43
Series-Parallel and Parallel-Series Systems, Limit Reliability Functions of Some, 62:129
Shape Control of Plates with Piezo Actuators and Collocated Position/Rate Sensors, 63:213
Single-Phase Flow through Porous Channels: A Review of Flow Models and Channel Entry Conditions, 62:203
Singular Measure Differential Systems with Impulse Effect, Variation of the Parameters Formula and the Problem of BIBO for, 60:153
Spanning Tree Problem, Stochastic, Interval Elimination Method for, 66:325
Stability Analysis, Practical, for Stochastic Time-Delay Systems, 63:265
Standardized Visibility in Fog, A Fuzzy Approach to the Definition of, 61:287
State Space Approach to Unsteady Free Convection Flow through a Porous Medium, 64:191
Stochastic Time-Delay Systems, Practical Stability Analysis for, 63:265
Storage Complexity of Some Estimators of the Median, 60:15
Summary Difference Equations in Several Independent Variables, Nonlinear Variation of Parameter Methods, 61:39

Third-Order Differential Equation of Retarded Type, Stability of, 60:147
Time Series Analysis, Pattern Recognition and Classification in, 62:29
Time-Dependent Stochastic Network, A Numerical Model for Tracking Populations through a, 61:163
Toeplitz Matrices, Symmetric, Stabilizing Trench's Algorithm to Invert, 60:249
Toeplitz Matrix, a Real Symmetric Positive Definite, Minimal Eigenvalue of, 64:93
Toeplitz System, Integer, An Error-Free Levison Algorithm to Solve, 61:135
Tomographic Reconstruction from Projections, A Computation for, 64:79
Torsional Wave Propagation in an Orthotropic Magneto-elastic Hollow Circular Cylinder, 63:281
Transient Analysis, Adapative *hp* Finite Element for, 65:315
Transport Phenomena, On Discrete Boundary Value Problems Arising in, 60:193
Traveling Salesman Problem, Special Cases of, 60:171
Trench's Algorithm to Invert Symmetric Toeplitz Matrices, Stabilizing, 60:249
Turbulent Boundary Layer Flow, Unsteady, with the Effect of Free Stream Velocity, Computer Simulation of, 63:151
Turning Points, Higher Order, 64:155
Two-Point Boundary Value Problems, Error Estimates for Shooting Methods in, for Second-Order Equations, 60:237

Velocity–Current Formulation for Stationary MHD Flow, 65:79
"Verticum"–Type Linear Systems with Time-Dependent Linkage, 60:89
Volterra Integral Equation, Two-Dimensional, Asymptotic Error Expansion of, by Iterated Collocation, 61:269
